📄 SUMMARY

Motivated Junior Web Developer and Technical Project Lead with a strong foundation in Chemical Engineering and modern web technologies. Proven ability to transition from core programming (HTML/PHP) to advanced stacks like **TypeScript** and **Prisma**. Experienced in leading development teams, managing project lifecycles using **Trello**, and leveraging **AI tools** to optimize code efficiency and deliver high-quality digital solutions.

👛 PROFESSIONAL EXPERIENCE

Technical Project Lead & Developer, *Digiko*

03/2026 – 05/2026 | Torino

- **Team Leadership:** Led a development team to build an **ESG (Sustainability) platform**, managing tasks and project roadmaps using **Trello**.
- **Backend Engineering:** Designed and implemented database schemas using **Prisma ORM** and **JSON**, ensuring robust data management.
- **Modern Stack Development:** Developed responsive interfaces using **TypeScript** and **Tailwind CSS**, moving beyond basic HTML/CSS.
- **AI Integration:** Effectively utilized AI-assisted development tools to accelerate coding, debugging, and problem-solving processes.
- **Project Communication:** Authored weekly progress reports for management and designed professional presentations using **Canva**.

🧠 SKILLS

Technical Skills: **Tech Stack:** Prisma ORM, Tailwind CSS, JSON, Responsive Design. | **Management:** Trello (Agile/Scrum), Stakeholder Reporting, Canva. | **AI Tools:** AI-Assisted Development & Prompt Engineering

Soft Skills: Problem-solving, teamwork, effective communication, and time management.
